Animal Details

Registered Name:	Tallai Brandy Snap	Pet Name:	Tallai Brandy Snap
Registration Number:		Breed:	Australian Labradoodle
Microchip Number:	953010005528961	Sex:	Female
Date of Birth:	25/4/2021	Colour:	Chocolate

Collection Details

Case Number:	21G46321	Approved Collection Method:	<input checked="" type="checkbox"/> Yes
Collected By:	Greencross Vets	Date of Analysis:	21/02/2024

Sample with Lab ID Number 21G46321 was received at Orivet Genetics, DNA was extracted and analysed with the following result reported:

Parentage Verification: QUALIFY

After examining the DNA markers, it can be concluded that in combination the Dam Tallai Polly Waffle (Tallai Polly Waffle), Microchip No. 953010004177018, Registration No. (Case No.: 20N10934) and the Sire Tallai Dreamworks (Tallai Dreamworks), Microchip No. 953010002717504 No. (Case No.: 19225086) QUALIFY as the parents of the offspring identified on this report.

Match Percentage: 99.47% [188]

Exclusion Percentage: 0% [0]

Inconclusive Percentage: 0.53% [0.53]

Inconclusive: snp28,

Inconclusive refers to the absence of a DNA marker (allelic dropout) at the SNP(s) identified. No DNA data was analysed at these SNPs and therefore these could not be used for parentage determination.

Mutations:

Mutations are simply random DNA coding (reading) errors that occur during replication. They represent a simple (one base) source of generation to generation variability. Mutation or reading slippage errors are usually seen at certain markers and when examining parentage will be associated at a specific marker. The markers are identified on the report.

Exclusions:

The DNA interrogated at these SNPs is not present in the parent examined, therefore based on the autosomal recessive mode of inheritance of the alleles, parentage is excluded. Exclusions are 100%.
